Utility & Construction Matting Systems
ICON offers a full line of wood and composite matting systems for the utility and construction industry. Whether you are looking for matting systems needed for crane support, pipeline projects, temporary road access, trestle bridges or other unique applications we can supply a product built to your unique specifications that meets the strictest industry standards, ensuring you a superior product every time. Available mat products include but are not limited to; crane mats, dragline mats, Emtek® engineered laminated mats and durable and re-usable composite DuraDeck mats.

ICON has partnered with some of the nation’s largest suppliers so we can always provide competitive pricing, fast delivery and the best personalized customer service.
Lightweight Composite Mats

Composite mats both protect your expensive turf and provide access and traction over sand, mud and other difficult surfaces. DuraDeck access mats may be used to create temporary roadways for vehicles, trucks, equipment, large working pads for drilling operations, administrative compounds, bone yards, temporary flooring or other industrial applications.

The DuraDeck composite access mat is a unique molded plastic mat that is durable, lightweight and extremely strong. Sections are engineered to provide ground protection, access over soft surfaces, provide a firm support base and traction for numerous other activities. DuraDeck sections can be carried by 1-2 persons and positioned easily as required on a jobsite. No tools are required for installation or removal of the mats.
